EXPERIENCE

Volunteer Gameplay Programmer — [Mirage Studios](#) (remote) JUL 2025 - PRESENT

Creature Collector Action Game - Unity (C#)

- Developed creature AI systems for overworld exploration and combat encounters
- Implemented spawning, party management, and creature capture mechanics
- Currently developing action-based combat systems

Game Dev Workshop Leader — *Tumo Lisboa, Portugal* SEP 2025 - PRESENT

- Leading game development workshops with Unity for students ages 12-18

Game Dev Teacher — *Sharkcoders, Portugal* SEP 2024 - PRESENT

- Teaching game development fundamentals to students ages 4-12

Junior Game Programmer — [ProudTurkeys](#) (remote) JUN 2023 - JAN 2024

Abomifighters: World League - UE5.2 (C++) | [STEAM](#)

- Implemented abilities using Gameplay Ability System including knockback and distance-based stun mechanics with Gameplay Effects and Tags
- Built multiplayer HUD with dynamic limb displays, radial cooldown visualization, and health bars
- Debugged multiplayer replication issues across UI, animations, and ability execution
- Verified Server/Multicast RPC implementation and variable replication for networked gameplay

EDUCATION

Digital Games Bachelor (Erasmus) MAR 2023 - AUG 2023

Cologne Game Lab - TH Köln, Germany

Game Development Bachelor SEP 2020 - AUG 2023

IADE - Creative University, Portugal

PROJECTS

Slimando — Unity (C#) | [Itch.io Link](#)

Roguelite top-down shooter, qualified for the Grand Final of GameJamPlus 2022/23

- Architected data-driven skill system supporting 60+ abilities with modular effect composition and runtime synergies
- Optimized rendering and particle systems to maintain stable performance with 100+ concurrent enemies
- Integrated and refined all game assets for cohesive gameplay experience

Ziniax Warriors — Unreal Engine 4.2 (C++) | [Trailer](#)

MOBA game for 5th Semester of University

- Built modular ability framework enabling rapid iteration and content addition
- Handled all programming responsibilities for 4-player competitive experience
- Presented to industry professionals, receiving positive feedback on technical implementation.

SKILLS

- Languages
 - C++
 - C#
- Engines
 - Unity
 - Unreal Engine 4/5 (GAS, Lyra, Replication)
- Tools
 - Git
 - Plastic SCM
 - JetBrains Rider
 - Visual Studio
- Specializations
 - Gameplay Systems
 - Combat Mechanics
 - AI Systems

LANGUAGES

English (C2 - Proficient)

Portuguese (C2 - Native)

INTERESTS

- Basketball
 - Competitive player since age 6
 - Youth coach (3 years)
